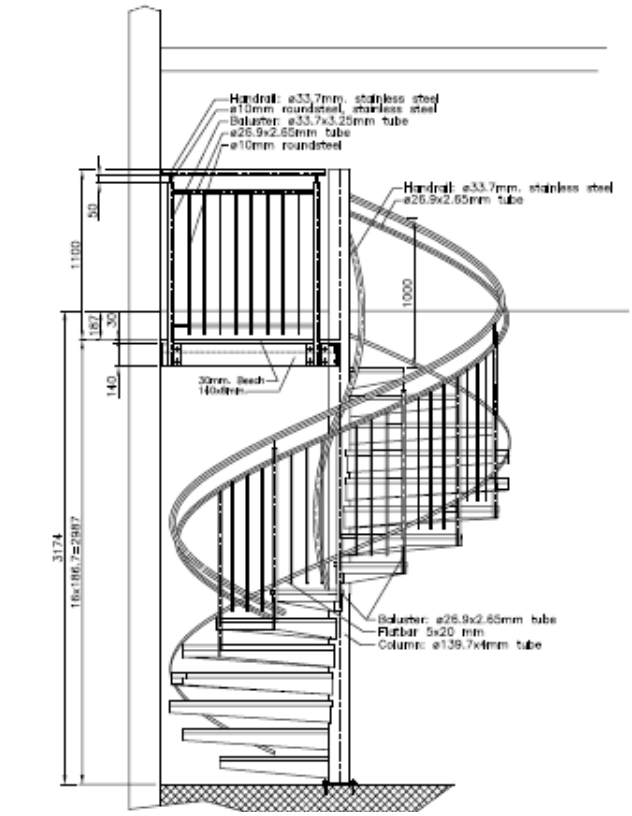
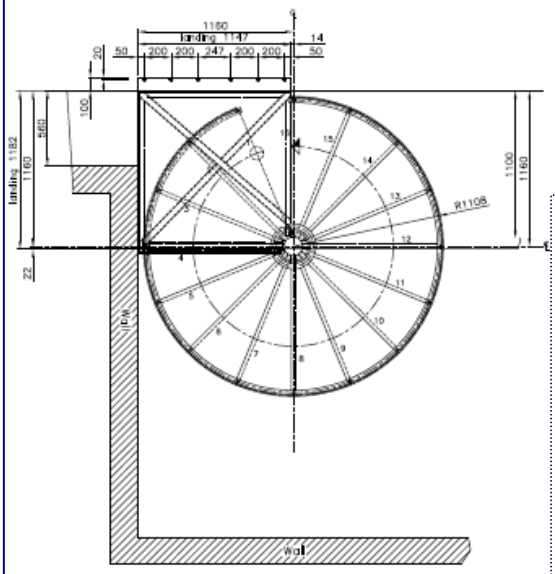
CASE STUDY – Bespoke Spiral Staircase – Leisure Centre, Norfolk

The leisure centre in Norfolk needed a functional, yet good looking staircase that would also comply with all the necessary regulations for public use. Eventually they settled on a fully bespoke spiral stair. Steel handrail, powder coated spindles and centre column allowed it to remain durable, whilst the stainless steel handrail and the beech treads took some of the harshness of a fully metal staircase away and gave it a more pleasant, warm feel.





TECHNICAL SPECIFICATION

FLOOR TO FLOOR HEIGHT	-	3174mm
