

## CASE STUDY – Bespoke Staircase– Weymouth

For this new build in Weymouth, openness was the key attribute required from this beautiful, fully bespoke straight flight staircase. In addition, the close proximity to the sea meant that the client also requested green glass riser panels as a subtle appreciation of the area. Additional balustrade completed this staircase giving an elegant formality to the room. The glass riser panels were complimented well by the glass balustrade both on the landing above and on the handrail of the stair. Metal handrails completed the smooth appearance of the feature.

### TECHNICAL SPECIFICATION

Height	-	2630mm
Rise	-	13x202,3mm
Going	-	225mm
Width of treads	-	850mm
