

CASE STUDY - Custom Made Modular Staircase - Model 500 – Ashurst

Our local client in this case study was looking to really modernise his new home. Situated in a narrow hallway, the design brief was for a staircase combining both contemporary style with an “open” feel to allow sufficient light to enter the room. Our signature open risers and glass balustrade gave the staircase a minimalist impression on the passage of light in the area, whilst still having an impact on visitors with its style. The stair in this case study was the Model 500, in stained beech and with stainless steel balustrade and glass infill panels. The steel stringers were powder coated to match the walls as closely as possible.
