

CASE STUDY - Traditional Style Staircase, Shaftesbury, Wilts

This new build required a staircase that would make an immediate impression upon visitors to the property. It also had a tricky entry and exit point and a headroom issue with the sloping ceiling above. We designed a striking 'S' Shaped staircase in solid beech that swooped up turning 180 degrees and a further 90 degree to wards the top. The bottom four risers were fully enclosed to allow an under stairs cupboard to be built. The stair was complimented bu a run of landing balustrade on the first floor.

TECHNICAL SPECIFICATION

FLOOR TO FLOOR HEIGHT	-	2651 mm
RISERS	-	13 @ 203.9mm
TREAD WIDTH	-	850mm
TREADS	-	42mm Solid Beech
STRINGERS	-	42mm Solid Beech
NEWEL POSTS	-	80 x 80mm Beech
HANDRAIL	-	42 x 60mm – no.1 in beech
ADDITIONS	-	lower 5 risers - closed
