

## CASE STUDY – WF Staircase – Boxmoore, Hertfordshire

The client had decided to refurbish their home and as part of this required a replacement staircase. We were asked to come up with a design that would allow plenty of light to go through the stairs, but also one that would allow the staircase to fit into a narrow area which had a very close wall at the end of it. The client also wished the stair to be a feature of the room; something a little special to look at. For this reason we went with a ¼ turn stair, to allow it to fit into the area, and also went with a WF design for the illusion of suspended treads.

### TECHNICAL SPECIFICATION

Floor height	-	2800mm
Rise	-	200mm
Going	-	240mm
Tread	-	42mm Oak
String	-	42mm Oak
Spindles	-	Stainless Steel spindles
Newel posts	-	160 x 42mm Oak
Handrail	-	160 x 42mm Oak
