

CASE STUDY – WF Staircase – Stanmore, Middlesex

For a complete renovation of their home, the client in this instance wished to keep the ascent from ground to floor light, as it would be formed almost above their kitchen working areas. However, the staircase also needed to fit in with a planned oak floor that was to be laid. To match these two needs, the WF staircase in Oak was the solution. Although many view solid timber stairs as being heavy and foreboding, the WF's stringer-less internal design allows it to give the impression of hanging in the air, allowing far more light through than other Oak staircases would.

TECHNICAL SPECIFICATION

Floor Height	-	2963mm
Stair Width	-	900mm
Spindles	-	Stainless Steel
Tread Type	-	42mm Oak
Stringer	-	42mm Oak wall stringer only
Rise	-	15 @ 197.5mm
