

CASE STUDY - WF STAIRCASE - Chandlers Ford - Hampshire

This WF staircase was designed to take up as little room as possible in the kitchen/living area of the family home of our client. The open risers and balustrade, along with the lack of an internal stringer, allowed more light to penetrate into the room, as well as giving a line of sight to the doorways. This client went for a special curved internal handrail when emphasised the swoop of the staircase. We produced the staircase in untreated Oak as the customer was to match it to their new flooring.
