

CASE STUDY – WF Staircase – Hamsey, East Sussex

The client was refurbishing an annex to his property and required proper access. After deciding to create a feature of the staircase rather than simply carpet one, he decided upon our WF system. A wall mounted stringer, painted to match the colour of the support wall, creates the impression that the treads are hanging suspended in mid air. The single stringer design also leave the staircase open and less imposing on the room it sits in.
