

## CASE STUDY - WF Staircase – Stroud, Gloucestershire

The situation presented in this case study was one where a limited amount of light could pass through the length of both the lounge and the kitchen. An existing staircase was blocking what little illumination there was, so the customer wanted a modern looking staircase which would both suit the property and allow as much light as possible through. The WF staircase, with its single wall stringer and open risers, was the ideal solution in this instance. The staircase is shown in Varnished Oak, with stainless steel spindles in the balustrade
