

# Karina Space Saving Domestic Staircase

The Karina is a specialist space saving staircase that has alternating treads. The basic kit has 11 treads / 12 risers and can span to a height of 2820mm. The treads are in beechwood and the balustrade consists of 20mm diameter vertical steel spindles. These spindles arch towards the top to provide a handrail. Balustrade is included down one side as standard but can be purchased for the second side. Landing balustrade kits and riser bars are available.
