

Model 40

Domestic Spiral Staircase

A simple bespoke spiral staircase that is available in diameters large enough for it to be used as a main domestic staircase.

The treads are solid timber either 40 or 50mm thick depending on the diameter of the staircase and the centre column is constructed using a series of steel barrels.

The balustrade has 20mm diameter spindles connecting the handrail to the treads. This balustrade can be continued along a landing level in horizontal lengths.

Steel riser bars are available to reduce the gap between the treads.
