## Model 70

### Domestic Spiral Staircase

This model is a more traditional in appearance. All visible parts are made from solid timber and there are several to choose from.

It is custom made to your floor to floor height and the diameters available mean it can be used as a primary domestic staircase.

The treads are 40mm or 50mm thick and the vertical timber spindles 20mm diameter.

Landing balustrade can be purchased to block off any voids surrounding the stair and mini timber riser pieces are available to reduce the gap between the treads.
