

## Traditional Style Bespoke Domestic Staircase

Our Traditional Style staircases are manufactured with a stringer down each side in a conventional manner. The word 'traditional' refers to the structure and not the overall feel to the stair which can be quite modern. We can incorporate glass infill panel to the balustrade or have vertical stainless steel spindles and the risers are generally left open. These are certainly not traditional staircases. They can be produced in straight flight form, quarter turn and half turn.
