FONTANOT INTRODUCES A RANGE OF STAIRCASES DESIGNED FOR "DO-IT-YOURSELF" ENTHUSIASTS
ARKÈ:  
CREATE YOUR STAIRCASE  
IN JUST HALF A DAY

YOUR STYLE
Find the staircase for your space in the shapes and colors that you prefer. 
You can find the right idea on: www.arke.ws.

SURVEY AND DIMENSIONS
Measure the height of your stairwell, from floor to floor, and the dimensions of the ceiling aperture.

CONFIGURATION
Choose the configuration which is best suited to your stairwell. If necessary, you can add supplementary accessories to the staircase.

THE PROJECT
You can use your PC to design your staircase like a real professional: www.arke.ws.

PURCHASING
All Arkè staircases are packed in boxes of a manageable size and can be taken home immediately on purchase.

ASSEMBLY
We supply you with a DVD and an instruction manual which will be useful during the installation. Arkè, the staircase which you can install in a few hours.
Klan

ANYTHING IS POSSIBLE!

CHOOSE YOUR STAIRCASE BY MATCHING THE COLOR OF THE STEEL TO THE COLOR OF THE WOOD AND ADDING SUPPLEMENTARY ACCESSORIES TO COMPLETE IT.

1 LANDING, 12 SOLID BEECH TREADS, AND RAILING...
ALL INCLUDED IN THE PRICE!

KLAN is created by matching the colors of the steel with the light (natural) or dark tinted solid beech treads. The wood-effect handrail is in PVC with an aluminum core and is available in light or dark versions, to match the shade of the treads. The railing is made up of steel balusters painted in black (RAL 9017), white (RAL 9010) or grey (RAL 9006). The finishes are black for the black staircase and grey for the grey and white staircases.

KLAN has an adjustable height between 253 and 306 cm. Purchasing one or more supplementary rises, the height of the staircase can reach 377 cm.
Klan
Klan
Klan / technical data sheet

Klan staircase is characterized by a landing which is adaptable during the installation to openings of any shape or size. Klan has an adjustable height between 253 and 306 cm.

</tbody>
</table>

**RISE ADJUSTABLE FROM 21 TO 23.5 CM**

* REPLACES THE EXISTING 125 CM POLE IN THE KLAN STAIRCASE

**DIAMETERS**

The diameters of the staircase are 120, 140 and 160 cm. The recommended opening in the floor is at least 5 cm larger than the diameter of the staircase. Example: Ø staircase 120 cm = Ø aperture 125 cm.
SUPPLEMENTARY TREADS / POLES / HANDRAILS

To reach a staircase height of 377 cm, you must purchase one or more supplementary treads comprising the structure, tread and balusters.

Supplementary pole and handrail modules (Table 1) must be purchased for certain configurations.

SUPPLEMENTARY BALUSTRADE

It is necessary to protect the upper floor aperture (fig. 1, 2, 3). It comes in 120 cm modules comprising 10 balusters, handrail and fixings. The balustrade can also assume a circular shape (fig. 2).

SUPPLEMENTARY TREADS / POLES / HANDRAILS

To reach a staircase height of 377 cm, you must purchase one or more supplementary treads comprising the structure, tread and balusters. Supplementary pole and handrail modules (Table 1) must be purchased for certain configurations.

RISER BAR

Allows to reduce the space between treads to prevent children from falling.

WOOD SHADERS

1. LIGHT OR DARK

2. STEEL COLOURS

   - GREY
   - WHITE OR BLACK

EXAMPLE

If you wish to purchase KLAN comprising 13 + 3 = 16 treads (see adjacent drawing), the following items are needed.

Civik Zink

THE STAIRCASE FOR EXTERNAL USE.

HOT DIP GALVANIZED TO PROTECT IT FROM ANY SORT OF WEATHER.

1 LANDING, 12 ZINC HOT-DIPPED TREADS, NUTS AND BOLTS IN STAINLESS STEEL, PVC-HANDRAIL AND RAILING... ALL INCLUDED IN THE PRICE!

CIVIK ZINK the spiral staircase for external use which combines functionality and solidity with long-lasting certainty. All metal parts are protected by being hot-dipped in zinc, this finish being what characterizes CIVIK ZINK as a product exclusively for external use. The handrail is in black PVC. Nuts and bolts are in stainless steel.

CIVIK ZINK has an adjustable height between 252 and 305 cm. By purchasing certain supplementary items, the staircase height can reach 376 cm.
Civik Zink
Civik Zink / technical data sheet

Civik Zink staircases are characterized by a landing which allows the staircases to be fitted to openings without a hole or with a square opening. Civik Zink has an adjustable height between 252 and 305 cm.

Karina

11 SHAPED TREADS, STEEL SUPPORTING STRUCTURE AND RAILING ON ONE SIDE...
ALL INCLUDED IN THE PRICE!

KARINA is the staircase designed for the smallest spaces. It is created with powder coated steel supports in black (RAL 9017), white (RAL 9010) or grey (RAL 9006) and black finishes. Characterized by light (natural) or dark tinted solid beech treads, which are carefully shaped and staggered, this staircase guarantees an excellent compromise between functionality and use of space.

The supplementary railing is available with a handrail in black polyurethane and black finishes, or with a wood-effect handrail in PVC or a handrail in solid beech, both with black finishes for the black staircases and grey finishes for the grey or white staircases.

KARINA has an adjustable height between 228 and 282 cm.
By purchasing certain supplementary items, the staircase height can reach 329 cm.
Karina

NO!

OK!
Karina
Karina / technical data sheet

Karina is characterized by 11 treads with 12 rises. The treads, complete with railing, are 57 cm wide, shaped and staggered, so guaranteeing an excellent compromise between functionality and use of space. The staircase is supplied with a railing on one side. Karina is adjustable in rise and in direction of rotation, and can assume different configurations.

RISE ADJUSTABLE FROM 19 TO 23.5 CM
SUPPLEMENTARY TREADS
The supplementary tread is always a right-hand side version. Adding one or more supplementary treads allows to reach a staircase height of 329 cm. Each tread consists of the structure, tread and balusters (Table 5).

SUPPLEMENTARY RAILING
It protects the second side of the staircase when it is far from the wall. It comprises 9 balusters and increases the dimension of the staircase by 3 cm.

SUPPLEMENTARY BALUSTRADE
It is necessary to protect the upper floor aperture. It comes in 120 cm modules comprising 10 balusters, handrail and fixings. It is available with the following handrails:
- black polyurethane
- light or dark PVC
- light or dark wood.
The balustrade with the polyurethane or PVC handrails can also assume a circular shape, while the balustrade with the wooden handrail can only be rectilinear.

SUPPLEMENTARY TREADS
The supplementary tread is always a right-hand side version. Adding one or more supplementary treads allows to reach a staircase height of 329 cm. Each tread consists of the structure, tread and balusters (Table 5).

RISER BAR
Allows to reduce the space between treads to prevent children from falling.

ALL INCLUDED IN THE PRICE!

KOMPACT is the only staircase in the world which is patented and adjustable in rise, going, and rotation during installation. Along with the maximum adaptability to the stairwell, this allows rectilinear configurations with one or two corners. The treads and the handrail are in light (natural) or dark tinted solid beech. The metal parts are painted black (RAL 9017), white (RAL 9010) or grey (RAL 9006). Finishes are black for the black staircase and grey for the grey or white staircases.

KOMPACT has an adjustable height between 191 and 303 cm. By purchasing certain supplementary items, the staircase height can reach 373 cm.
Kompact
Kompact
Kompact / design your staircase

**KOMPACT** comprises 12 treads with steel supports and a railing on one side. The different arrangement of the 12 treads (13 rises) and the choice of going, **KOMPACT 74** from 18 to 22 cm, or **KOMPACT 89** from 22 to 26 cm, allow the creation of 156 different configurations.

The plans indicate the maximum and minimum dimensions of all the configurations which are possible with **KOMPACT I** straight, **KOMPACT L** at 1/4 of a turn and **KOMPACT U** at 2/4 of a turn. **KOMPACT** is adjustable in rise, going and rotation. The sense of direction of the staircase can be clockwise or anti-clockwise.

**Is there an existing opening?**

Amongst the 156 plans, find one which is smaller than the dimensions of the opening in the floor. Keep in mind that the floor aperture must be at least as wide as the staircase minus two treads (Diagram 1).

**Do you still have to make the opening?**

Identify amongst the 156 plans the one which is best suited to your stairwell: the opening in the floor must be at least as wide as the chosen plan minus two treads (Diagram 1).
**Legend**

- **R** rise (rise)
- **G** going (going)
- **W** clear width (clear width)
- **C** clockwise rotation
- **A** anticlockwise rotation

---

**Kompact 74**

- R from 17 to 23.5 cm
- G from 18 to 22 cm
- W from 70.5 to 74.5 cm

---

**Kompact 89**

- R from 17 to 23.5 cm
- G from 22 to 26 cm
- W from 86.5 to 90.5 cm

---

**Design your staircase online.**

**WITH THE STAIRPLANNER YOU WILL IMMEDIATELY BE ABLE TO FIND THE BEST KOMPACT FOR YOUR HOME.**

**FOR FURTHER INFORMATION VISIT THE WEBSITE WWW.ARKE.WS**
Kompact / technical data sheet

Kompact is composed of 12 treads with 13 rises and a railing on one side. The treads, complete with railing, are 74 cm or 89 cm wide. Kompact has three configurations:
- I-shaped straight
- L-shaped with 1/4 of a turn
- U-shaped with 2/4 of a turn.
Kompact is adjustable in rise, going and rotation.

RISE ADJUSTABLE FROM 17 TO 23.5 CM
If you wish to purchase KOMPACT 74L comprising 12 + 3 = 15 treads (see adjacent drawing), the following items are needed:

1. KOMPACT STAIRCASE 74L (standard)
2. SUPPLEMENTARY TREADS
3. SUPPLEMENTARY BALUSTRADE
4. SUPPLEMENTARY RAILINGS
5. SUPPLEMENTARY ITEMS OVERVIEW

### SUPPLEMENTARY ITEMS OVERVIEW

<table>
<thead>
<tr>
<th>TREAD</th>
<th>RISER</th>
<th>BALUSTRADE (120 CM)</th>
<th>RAILING</th>
</tr>
</thead>
</table>

### SUPPLEMENTARY BALUSTRADE

It allows the protection of the upper-floor aperture. It is a 120 cm module, composed of 10 balusters, handrail and fixings.

### SUPPLEMENTARY RAILING

It protects the second side of the staircase when it is far from the wall. It is a module composed of 5 balusters, handrail and fixings. The railing increases the dimension of the staircase by 4 cm.

In diagrams 2 and 3 you can count the number of balusters necessary on the second side of the staircase (the balusters are represented by numbers and dots). Example: if you wish to apply the supplementary railing only on the left side of the KOMPACT 74 staircase, as in diagram 2, you will need to add up the quantity of balusters: 3 + 4 + 2 = 9 and therefore order 2 supplementary railing modules.

### SUPPLEMENTARY TREADS

To reach a staircase height of 373 cm, you must purchase one or more supplementary treads comprising the structure, tread and balusters (Table 7).

### RISER BAR

Allows to reduce the space between treads to prevent children from falling.

### WOOD SHADES

- Light or dark

### STEEL COLOURS

- Grey
- White
- Black

**SUPPLEMENTARY TREADS**
To reach a staircase height of 373 cm, you must purchase one or more supplementary treads comprising the structure, tread and baluster (Table 8).

**SUPPLEMENTARY RAILING**
It protects the second side of the staircase when it is far from the wall. It is a module composed of 4 balusters, cable, handrail and fixings. The railing increases the dimension of the staircase by 4 cm. In diagrams 5 and 6 you can count the number of balusters necessary on the second side of the staircase (the balusters are represented by numbers and dots). Example: if you wish to apply the supplementary railing only on the left side of the Komoda 74 staircase, as in diagram 5, you will need to add up the quantity of balusters: 1 + 1 + 2 = 4 and therefore order 1 supplementary railing module.

**SUPPLEMENTARY BALUSTRADE**
It allows the protection of the upper-floor aperture. It is a 120 cm module, composed of 5 balusters, cables, handrail and fixings.

**SUPPLEMENTARY PROTECTION PANEL**
This safety accessory can be applied to balustrades with horizontal elements to prevent children from climbing over them. It consists of a transparent shockproof polycarbonate panel 36 cm high and 68 cm long, which can be shortened length-wise during the installation phase. The brackets are made of transparent polycarbonate. The following table can be used to calculate the number of elements to be ordered:

<table>
<thead>
