

**WF FLOATING
STAIRCASE**

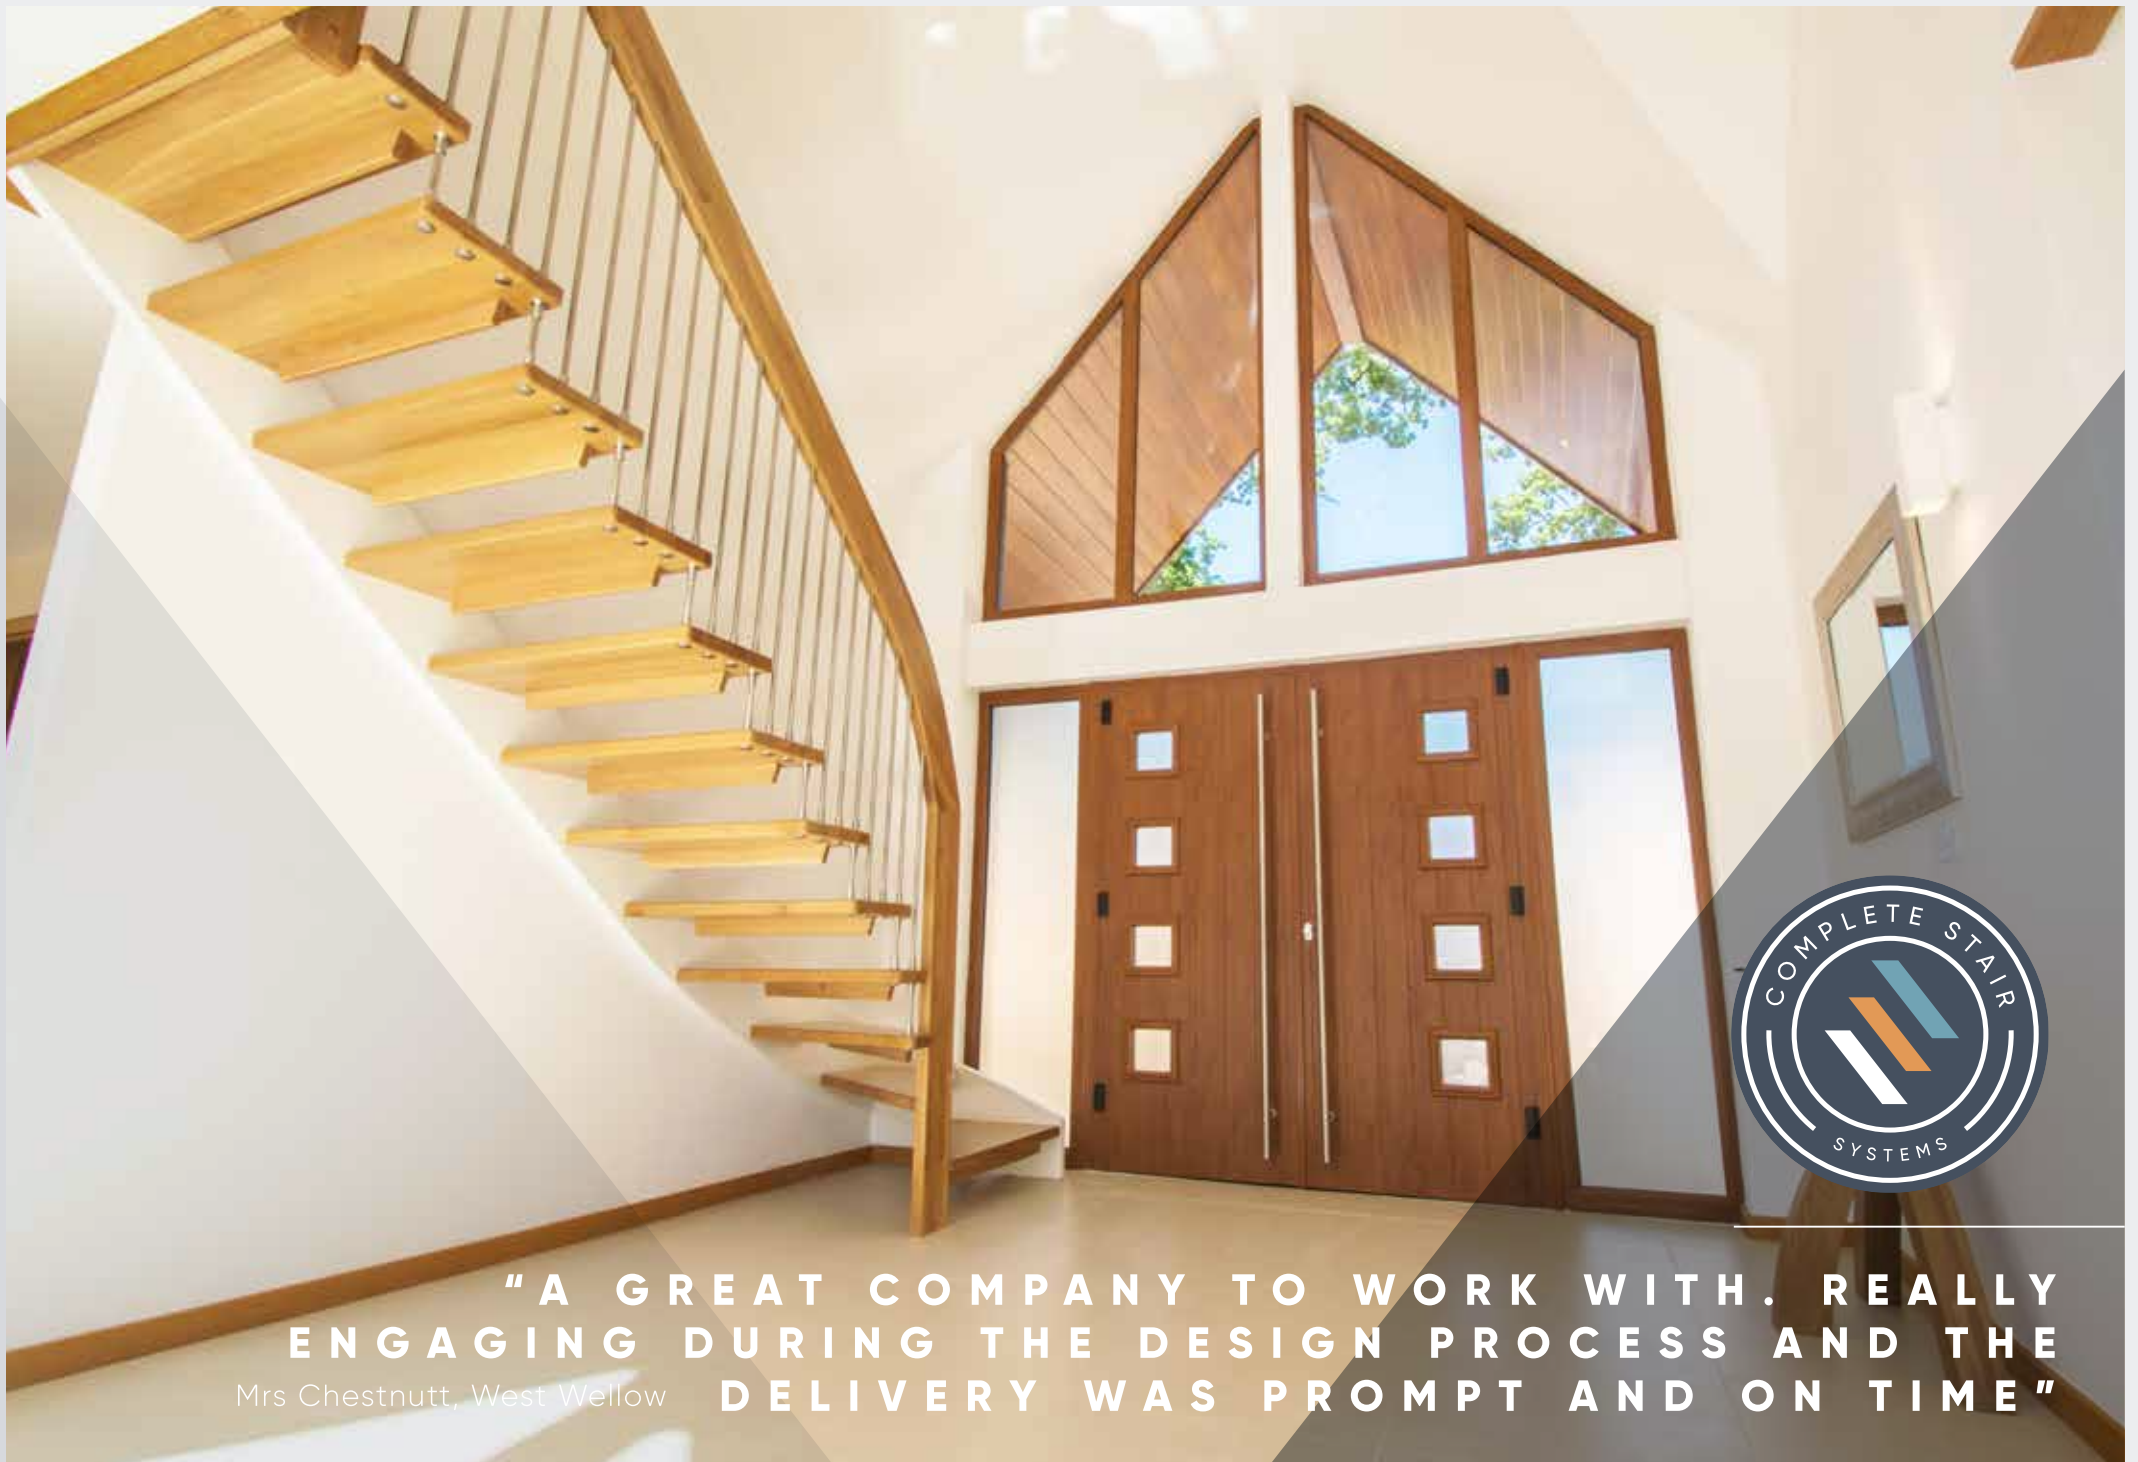

CREATE A STUNNING VISUAL IMPACT

Given its location within a building, a staircase has the power to create a stunning visual impression for anyone entering the property.

A stunning and stylish staircase offers you the perfect opportunity to impress, whilst reflecting the style and character of the rest of the interior. Our WF floating timber staircase is uniquely constructed with only a wall stringer. This leaves the open side suspended in mid air, creating a stunning open effect. This is achieved by a specially made handrail which takes the load off the treads through the spindles.

It is the most open and light staircase we supply and it is very economically priced.

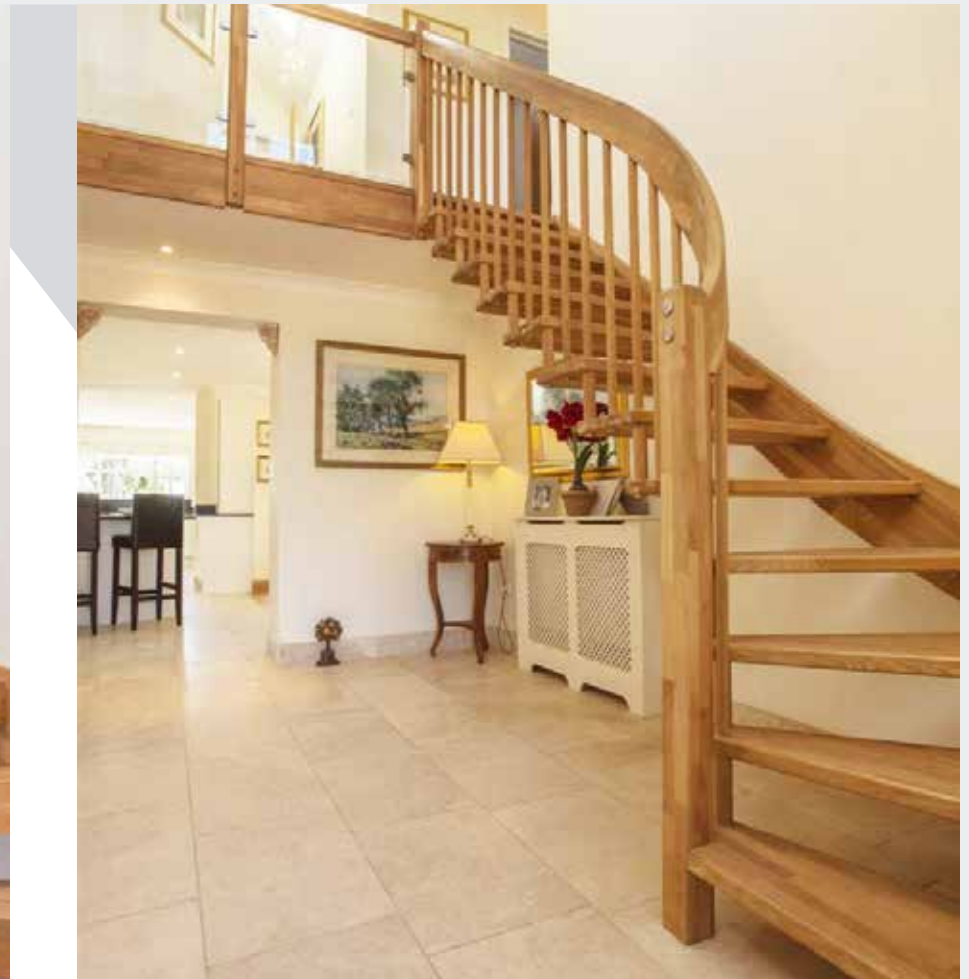

"A GREAT COMPANY TO WORK WITH. REALLY ENGAGING DURING THE DESIGN PROCESS AND THE DELIVERY WAS PROMPT AND ON TIME"
Mrs Chestnutt, West Wellow

YOUR WF FLOATING TIMBER STAIRCASE

OBTAINING A QUOTE

The model staircase is custom made so has to be priced on an individual basis. Given the vast range of materials and options and the variants of height and shape we need to know the following information to work out a price.

- Floor to floor height
- Shape of Staircase (straight / quarter turn / half turn)
- Landing balustrade required?
- Your choice of Tread

Please forward any relevant drawings and photos to info@completestairsystems.co.uk

TREAD OPTIONS

The WF staircase is supplied with 42mm solid timber treads and wall stringer. This model needs to be constructed in hardwood for strength. As standard the timber is formed with laminated blocks spanning the entire width glued together against the grain for strength and rigidity. With some timbers there is also an option to opt for the 'parquet' option. This option is still produced with solid timber but with much smaller blocks – very much like a parquet floor. This option is cheaper to produce and offers a large saving over the standard construction method.

Generally the timber is supplied factory finished oiled or with a natural lacquer varnish finish. They can also be supplied 'RAW' for finishing by others.
